

## Building Foundational Skills

Dear Family,

I have exciting news! We are participating in **Special Olympics Young Athletes**, an inclusive sport and play program that sets the stage for a life of physical activity, friendships and learning. Children with and without intellectual disabilities learn how to play with others as they develop basic sport skills, such as running, kicking and throwing. We'll send newsletters home from time to time to fill you in on the skills we're learning and how you can help at home.

We're starting the program with fun activities that develop **foundational skills**. Action songs are a great example. Did you know that doing motions with your child as you sing "If You're Happy and You Know It" has huge benefits? It's true. This classic song involves actions, such as clapping hands and tapping the head, which increase **body awareness**. Body awareness is an important factor in health and physical fitness. Encourage your child to join you and other family members in singing an action song after dinner or before bedtime. It's a wonderful way for the whole family to support your child's development.

Sincerely,

---

Teacher

Foundational skills promote body awareness, strength, flexibility, coordination and endurance.

### Healthy Habits

Periodically set aside time for physical activity as a family. Take a walk, practice Young Athletes activities, or play some upbeat music and dance together. These times not only promote physical well-being, but they also increase family connections. Don't be surprised if they become much-anticipated activities for your entire family!

### More Than Motor Skills

Motor development isn't the only benefit of Young Athletes activities. The program enhances many other abilities, including relationship skills. Children who participate learn how to share, listen to others, take turns and work in teams—all valuable lifelong skills.
